Advancing Leadership

PROGRAM OVERVIEW

You're invited to be a part of Oshkosh's advancing leadership program! This is a four-month, blended program of facilitated virtual sessions, self-led practical activities and a two-day, in-person capstone residency.

Program objectives

Know the importance of building trust and develop new skills to do so through effective communication.

Understand the personal, team and organizational implications of change and how to lead through it.

Learn to improve personal and team performance by leveraging the Impact Team Performance Model™.

Use real scenarios and personal schedules to improve time management and prioritization.

Explore and refine a systems thinking approach to better collaborate across segments.

Commitment

Your attendance at all virtual and in-person sessions is essential to completing the program. Equally important is the bridgework, which can take up to three hours between virtual sessions and includes both individual and collaborative work. You can complete these activities at your own pace.
